- Finance and Accounting
- Human Resources
- Information Technology
- Legal and Compliance

Worldwide Presence

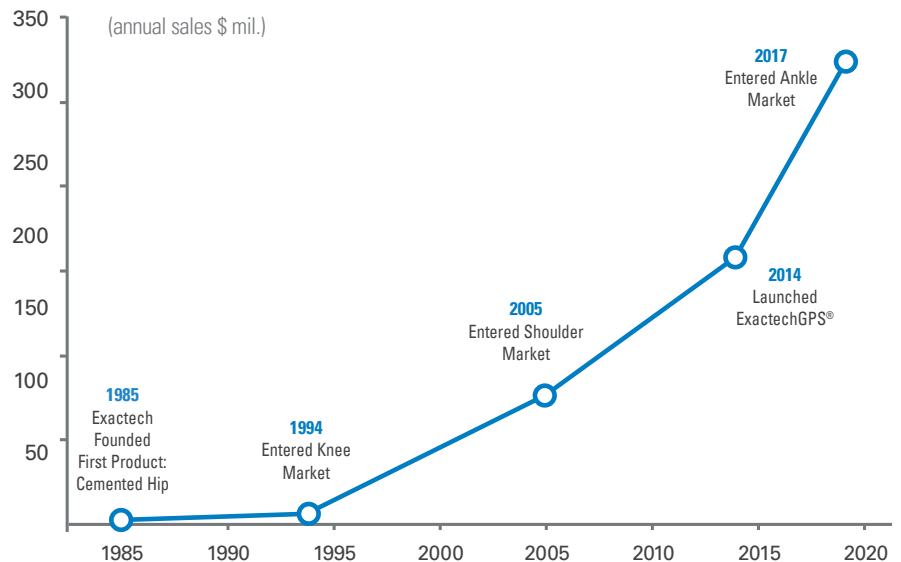

20+ acre global headquarters
Gainesville, Florida

Distribution in more than 35 countries

Our History

Exactech was founded in 1985 by Dr. Bill Petty, an orthopedic surgeon, Dr. Gary Miller, a biomedical engineer and Betty Petty. They started Exactech with the belief that we should go to work every day for the same reason that orthopaedic surgeons do: to help people who've been injured or who have arthritis. This purpose has guided our company culture and our approach to providing the solutions that surgeons need to get the outcomes they expect for their patients. With this strong foundation, we've continued to evolve and grow. Most recently, our acquisition by TPG Capital in 2017 and the introduction of Darin Johnson as President and CEO in 2020 have allowed us to invest even more in what we do best.
